

L006 5-Digit FSS Scheme—Periodicals, Standard Mail, and Package Services Flats in Bundles

[4-17-11] L006 describes the optional 5-digit Flats Sequencing System scheme sortation list. Further information on the FSS optional preparation can be found in DMM 705.14.0. The pieces within the scheme bundles are processed into delivery sequence at the same time in the same operation and therefore are not required to be prepared in individual carrier route or 5-digit bundles.

All bundles for FSS ZIP Codes must be prepared the same way using the instructions in DMM 705.14.0. Once all the bundles have been prepared, place the bundles on pallets (or equivalent containers) or in sacks (or approved alternate containers). The bundles' content is determined by the listing of 5-digit ZIP Codes in Column A. Each entry represents an individual scheme listing. When the 5-digit FSS scheme sort is used, mail for the 5-digit ZIP Codes shown in Column A must be combined in bundles for all combinations shown in Column B for which mail exists. Bundles of 5-digit FSS scheme mail must be prepared with the Label To information shown in Column B. All 5-digit FSS scheme bundles must include the appropriate OEL under 708.7.0, which must contain 5-digit ZIP Code listed in Column B.

Bundles which cannot be placed on an individual scheme pallet (or in an individual scheme sack or alternate container) may be combined on an FSS facility pallet (or in an FSS facility sack), identified in Column C. Preparation of the FSS facility pallet (or sack or alternate container) allows all mail receiving FSS processing to be isolated for optimal mail flow.
