

434 Postage Payment and Documentation

Overview

- 1.0 Basic Standards for Postage Payment
- 2.0 Postage Payment for Presorted First-Class Package Service Parcels
- 3.0 Mailing Documentation

1.0 Basic Standards for Postage Payment

[1-27-13] Postage for First-Class Package Service parcels must be paid with postage evidencing system postage or permit imprint as specified below. Parcels mailed at commercial plus prices must be mailed with permit imprint postage. All pieces in a mailing must be paid with the same method unless otherwise authorized by Business Mailer Support (see 608.8.0 for address).

2.0 Postage Payment for Presorted First-Class Package Service Parcels

2.1 Permit Imprint Postage

All First-Class Package Service parcels may bear permit imprint postage under 604.5.0. Parcels entered at commercial plus prices and all mail manifested using the Electronic Verification System (eVS) under 705.2.9 must be paid using a permit imprint. A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support.

2.2 Affixed Postage for First-Class Package Service Parcels

[1-27-13] Each presorted First-Class Package Service parcel bearing postage evidencing system indicia (IBI Meter or PC Postage permitted for Commercial Base, or PC Postage permitted for Commercial Plus parcels) must bear one of the following:

- a. The full numerical value of postage at the First-Class Package Service price for which it qualifies.
- b. Full numerical value of postage in an amount not less than the lowest applicable First-Class Package Service parcel price if authorized by Business Mailer Support, plus full numerical value of postage for additional ounces.

3.0 Mailing Documentation

3.1 Completing Postage Statements

Unless manifested using eVS under 705.2.9, any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction.

**3.2 Basic Documentation Standards**

Supporting documentation (see [708.1.0](#)) of postage is required for each mailing except for eVS mailings under [705.2.9](#), or unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance.

3.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle.

3.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards.

3.5 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#).

3.6 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, price, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement.

3.7 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and prices claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster.
