Examples of Smart Choices

These examples show how mailing services can be combined to meet your needs.

Example 1: Sending a Valuable Item

Jane’s niece is getting married next month, and Jane wants to send a piece of heirloom jewelry to the bride. The jewelry has a lot of sentimental value, so Jane wants to be sure that it will arrive safely. Jane identifies three possible options:

- **Option A** Priority Mail Express
  
  Priority Mail Express automatically includes insurance up to $100 and guarantees delivery to Jane’s niece in 1 to 2 days. Additional insurance may be purchased. Jane will also receive a mailing receipt and confirmation that the package has been delivered and, if requested, has been signed for by her niece.

- **Option B** First-Class Package Service–Retail with Registered Mail
  
  First-Class Mail offers delivery at a low cost and can be combined with Registered Mail, a service that provides the highest level of mail security during transit. Insurance can be purchased for items up to $50,000 in material, but not sentimental value.

- **Option C** First-Class Package Service–Retail with Insurance
  
  First-Class Mail offers delivery at a low cost and can be combined with insurance for up to $5,000. Insured mail will cover the jewelry’s material value should the piece get lost or damaged, but it cannot cover its sentimental value.

**Jane’s Decision**

Jane decides that speed is less of a priority than security. Jane chooses First-Class Mail and, because the jewelry has greater sentimental than monetary value, she decides to add Registered Mail service so she can feel confident that her heirloom will be as secure as possible during transit.
Example 2: Sending an Important Document

Maria recently sold her car and needs to transfer the title to the new owner. Maria wants to be certain that the new owner gets the title to complete the sale. Maria considers these options:

**Option A**  
Priority Mail Express

Priority Mail Express will arrive at many locations the day after it is mailed. Priority Mail Express also provides Maria with proof that she mailed the title, the ability to track it online or by phone, and notification that it was delivered. Maria can also request a copy of the recipient’s signature.

**Option B**  
Priority Mail with Signature Confirmation Service

Priority Mail will get the title to its destination in 1-3 days. Priority Mail with tracking lets her obtain delivery information online or by phone. If Maria uses Signature Confirmation she gets the same delivery information, plus she can request a copy of the recipient’s signature.

**Option C**  
First-Class Mail with Certified Mail and Return Receipt

First-Class Mail will get the title to its destination in 2 to 5 days. Certified Mail with Return Receipt will give Maria proof that she mailed the title and will return a card to her with the date the title was delivered and the signature of the person who received it.

**Maria’s Decision**

Maria wants a copy of the signature returned to her to prove that the title was delivered, and she wants to get the lowest price she can. Maria decides that First-Class Mail with Certified Mail and Return Receipt is the best option.
Addressing Your Mail

The accuracy of the address affects the speed and handling of your mail.

**Return Address**
Print or type your address in the upper left corner on the front of the envelope.

**Recipient Name**

**Name of Organization**

**Street Address**
Use a Post Office box or street address, but not both. If the address also has a directional (for instance, NW for Northwest), be sure to use it. There may be more than one Main Street.

**Extra Services**
Place labels for extra services above the delivery address and to the right of the return address, or to the left of the postage.

**Postage**
Use stamps, a postage meter, or a PC Postage system to affix the correct amount. You can calculate postage online at [pe.usps.com](http://pe.usps.com).

**Apartment or Suite Number**
The correct apartment or suite number helps to ensure delivery to the right location.

**City, State, and ZIP Code**
To find the correct spelling of a city name or to find a ZIP Code, visit [www.usps.com](http://www.usps.com) or call 1-800-ASK-USPS. Using the correct ZIP Code helps to direct your mail more efficiently and accurately.
Envelopes

Letters, bills, greeting cards, and other documents can be sent in standard white, manila, or recycled paper envelopes. Items needing extra protection can be sent in bubble-lined, padded paper, or waterproof envelopes. These envelopes, along with stationery and prepaid First-Class Mail postcards and envelopes, can be purchased at the Post Office.

Priority Mail Express and Priority Mail envelopes are available at your Post Office or visit www.usps.com/store. You must use the USPS-produced address label for Priority Mail Express.

Online Shipping Labels
You can print and pay for your Priority Mail Express and Priority Mail postage labels online using Click-N-Ship. USPS Tracking is provided free for domestic Priority Mail. International labels with postage may be purchased online for Global Express Guaranteed, Priority Mail Express International, Priority Mail International, and First-Class Package International Service using Click-N-Ship. You can arrange for free Package Pickup online. Learn more about Click-N-Ship at www.usps.com/ship/online-shipping.htm.

Addressing

Placement
Print the delivery and return addresses on the same side of your envelope or card. The addresses should be written parallel to the longest side.

Legible
Type or print clearly with a pen or permanent marker so the address is legible from an arm’s length away. Do not use commas or periods.

Return Address
A return address is required on most mail.

Priority Mail Express
For Priority Mail Express, you must use a USPS-produced address label provided by the Post Office.

Military Mail
Military addresses must show the full name with middle name or initial and the PSC number, unit number, or ship name. Replace the city name with APO, FPO or DPO, and the state with AA, AE, or AP, and include the ZIP + 4 Code.

Preparation of Packages

Careful preparation of your package helps to ensure safe delivery.

The Box
Choose a box with enough room for cushioning material around the contents. Sturdy paperboard or corrugated fiberboard boxes are best for weights up to 10 pounds. If you are reusing a box, totally remove or obliterate all previous labels and markings with heavy black marker.

Where to Find Boxes
You can purchase boxes and tubes of various sizes at most Post Offices. Select Priority Mail Express and Priority Mail boxes are available free at the Post Office for items sent using either of these services. While you are not required to use the free packaging for these services, you must use the USPS-produced address label provided by the Post Office for Priority Mail Express. To order Priority Mail Express or Priority Mail boxes at no extra charge, call 1-800-222-1811 or visit www.usps.com/store.

Cushioning
Place the cushioning all around your item or items. You can use newspaper, “foam peanuts,” or shredded paper. Close and shake the box to see if you have enough cushioning. If you hear items shifting, add more cushioning. Placing an extra address label with the delivery and return addresses inside the package will ensure that the item can be delivered in case the outside label becomes damaged or falls off.

Mailing Fragile Items
Use foamed plastic or padding to protect your items, placing the cushioning inside hollow items as well. Mark the package “Fragile” or mark “Perishable” on packages that contain food or other items that can spoil. Careful packaging is the best way to safeguard your valuable items against damage.

Mailing Heavy Items
If you are mailing a very heavy or very dense item, start with a sturdy box, pack the contents securely with a strong material for bracing to prevent shifting, and tape all the edges with reinforced tape. Packages heavier than 70 pounds cannot be mailed.

Sealing
Tape the opening of your box and reinforce all seams with 2-inch-wide tape. Use clear or brown packaging tape, reinforced packing tape, or paper tape. Do not use cord, string, twine, masking, or cellophane tape. Place a strip of clear packaging tape over your label to prevent the address from smearing.
**Return Address**
Print or type your address in the upper left corner on the same side of the package as the delivery address.

**Delivery Address**
Print or type the delivery address parallel to the longest side of the package. Type or print clearly with a pen or permanent marker so that your address is legible from an arm’s length away. Do not use commas or periods.

**Confirmation Services**
Labels for USPS Tracking or Signature Confirmation are placed to the left of or above the address label.

**Extra Services**
Place labels for extra services above the delivery address and to the right of the return address, or to the left of the delivery address.

**Postage**
Use stamps, a postage meter, or a PC Postage system to affix the correct amount. You can calculate and purchase postage online at [www.usps.com](http://www.usps.com).

**City, State, and ZIP Code**
To find the correct spelling of a city name and state abbreviation or to find a ZIP Code, visit [www.usps.com](http://www.usps.com) or call 1·800·ASK·USPS. Using the correct ZIP Code helps direct your mail more efficiently and accurately.

**Drop Off**
If your mail item weighs 13 ounces or less, and you have affixed correct postage, you can drop it into a blue collection box. If your item weighs more than 13 ounces, and you have affixed postage stamps, you must take it to an employee at the retail counter of a Post Office.
Tips and Tools for Measuring

Use these rulers and guide boxes to measure letters and large envelopes.

- **Maximum size for Postcards**: 6" long x 4-1/4" high
- **Minimum size for Postcards and Letters**: 5" long x 3-1/2" high
- **Maximum thickness for Letters**: 1/4" thick
- **Maximum thickness for Large Envelopes**: 3/4" thick
Once a piece of mail exceeds the maximum length, height, or thickness of one shape, it automatically gets classified as the next largest shape.

maximum size for Letters
11-1/2" long x 6-1/8" high
Large Envelopes exceed one of the letter size maximum dimensions.

Unusual Shapes and Sizes
Sometimes a piece of mail requires additional postage because it is a certain shape or size that is difficult to process on mail sorting machines. To make sure you’re paying the correct postage, visit pe.usps.com. These are examples of mail that could require additional postage:

- Square envelopes
- Envelopes on which the address is written parallel to the shorter edge

As with domestic mail, you can choose the best service based on speed, cost, and extra services. Customs declaration forms are required on most international packages. All Customs forms must be electronically generated. If you are not able to do this, take your hand-written Customs form to any Post Office and the retail clerk will be happy to submit the electronic information for you. To learn more about options for international mail and to calculate postage, visit www.usps.com/international or call 1-800-ASK-USPS. Your Post Office can also help you send mail internationally. Not sure which Customs form to use? A convenient Customs forms indicator can be found at pe.usps.com.
