Price Eligibility Overview	Bundles of USPS Marketing Mail must be sorted and prepared under the standards for the price claimed. Prices are bundle-based. Prices are based on the preparation of mail in bundles and are not affected by the pallet on which a bundle is placed.
General Bundle Preparation Standards	Bundle preparation must meet the applicable general standards in 245.5.0 (Preparing Nonautomation Flats), 245.6.0 (Preparing Enhanced Carrier Route Flats), or 245.7.0 (Preparing Automation Flats).
Bundle Size (705.8.9)	<p>Prepare a bundle when there are 10 or more pieces for the same presort destination or 10 or 15 pieces as applicable to a 5-digit destination within an individual mailing. Bundles are not subject to a specific thickness limit. When there are:</p> <ul style="list-style-type: none"> ■ Less than 10 pounds for a destination, the pieces must be prepared in a single physical bundle. ■ 10 or more pounds for a destination, pieces should be prepared in bundles weighing from 10 to 20 pounds each except that the last bundle may weigh less than 10 pounds and mailers may balance the mail in bundles so that the total number of physical bundles prepared for a presort destination do not exceed the number of 10-pound increments to that destination. For example, if there are 25 pounds of mail to a 3-digit ZIP Code presort destination, bundles could be prepared as: <ul style="list-style-type: none"> – Two 8-pound bundles and a 9-pound bundle; – A 12-pound bundle and a 13-pound bundle; – A 20-pound bundle and a 5-pound bundle; or – Other combinations that result in no more than three bundles.
Securing Individual Bundles (705.8.5.11)	<p>Bundles on pallets must be secure and stable and able to withstand normal transit and handling without causing breakage or injuring USPS employees. To prevent broken bundles, material used to secure bundles must be adequately strong, sealed securely (e.g., by heat or adhesive), and fit tightly around the bundles. Prepare bundles using one of these methods to secure individual bundles placed on 5-digit, 3-digit, SCF, ASF, and NDC pallets:</p> <ul style="list-style-type: none"> ■ Use heavy-gauge shrinkwrap plus one or two bands. ■ Use only heavy-gauge shrinkwrap. ■ Use two bands, one around the length and one around the width. Use sufficient tension. Wire and metal strapping are prohibited.
Copalletized Bundles	Copalletization allows mailers to place together on pallets bundles from separate mailings that have been independently presorted in accordance with applicable standards (e.g., ECR, automation, and presorted price mailings). Each separate mailing must separately meet the minimum volume and other requirements described in 705.11.0 unless bundles are prepared under 705.11.0 (“Combining Automation Price and Nonautomation Price Flats in Bundles”). Mailers must bundle their mail separately according to the applicable requirements in 245.5.0 for Presort, 245.6.8 for Enhanced Carrier Route, or 245.7.0 for Automation. Copalletization requires Business Acceptance Solutions authorization (705.8.7).
Pallet Presort and Labeling (705.8.10)	<p>At the mailer’s option, bundles of flats may be palletized using the advanced presort options in 705.10.0, 705.12.0, or 705.13.0. These presort options require PAVE-certified software.</p> <p>Copalletized mailings: Bundles of presorted price and automation price flats must be placed on separate 5-digit and 5-digit scheme (L001) pallets from ECR price bundles. Bundles from ECR, automation, and presorted price mailings may be placed together on all other remaining levels of pallets.</p> <p>A direct container discount is allowed for USPS Marketing Mail Saturation Flats (including EDDM, not EDDM – Retail) and High Density Plus Flats in 5-digit direct containers (pallets, sacks, and tubs).</p> <p>There is no minimum-load requirement for MNDC pallets of bundles.</p>
