POSTAL SERVICE

39 CFR Part 111

New Mailing Standards for Domestic Mailing Services Products

AGENCY: Postal Service[™].

ACTION: Proposed rule.

SUMMARY: On April 9, 2024, the Postal Service (USPS®) filed a notice of mailing services price adjustments with the Postal Regulatory Commission (PRC), effective July 14, 2024. This proposed rule contains the revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®) that we would adopt to implement the changes coincident with the price adjustments.

Proposed prices will be available under Docket No. R2024-2 on the Postal Regulatory Commission's Web site at

www.prc.gov.

The Postal Service's proposed rule includes changes to prices, mail classification updates, product simplification efforts, and revisions to the DMM.

Different Additional Ounce Rates for First-Class Mail® Flats

Currently, First-Class Mail[®] flats incur a first ounce price and a uniform additional ounce price that is applied at each level from the second to the thirteenth ounce.

The Postal Service is proposing a change that will allow the Pricing department to provide a distinct price at each ounce increment.

USPS Marketing Mail Flat-Shaped – Separating Lightweight and Heavyweight Rate Categories

The Postal Service is proposing to divide some USPS Marketing Mail flatshaped pieces into two distinct pricing categories, lightweight (0 to 4 ounces) and heavyweight (from above 4 ounces up to 16 ounces). Lightweight pieces will continue to have only a piece-price component, with dropship discounts available for different entry points. Heavyweight pieces will have per-piece and per-pound price components, the per-pound components apply to the entire weight of the piece, with per-pound dropship discounts available for different entry points.

Business Reply Mail (BRM) Simplification

The Postal Service is proposing to incentivize Qualified Business Reply Mail (QBRM) customers to enroll in Intelligent Mail Barcode Accounting (IMbA) by waiving annual account maintenance and quarterly fees and by reducing the perpiece fee. Customers who link current QBRM permits to an Enterprise Payment Account (EPA) and successfully complete the onboarding process will have subsequent annual and quarterly fees waived and receive a reduced QBRM IMbA per-piece fee.

Elimination of Simple Samples (Product Samples)

Simple Samples, also referred to as Product Samples, is a type of Marketing Parcel created to allow mailers to distribute sample-size products weighing up to 16 ounces in "targeted or every door" areas without the use of outer packaging.

The Postal Service is proposing to eliminate this product offering due to low customer usage. Alternative, economical products are available.

Catalog Price Incentive – Marketing Mail and Bound Printed Matter

The Postal Service is proposing to revise the mailpiece requirements for catalogs and to offer a price incentive to mailers who mail catalogs that meet these revised requirements. The incentive and revisions would apply to all USPS Marketing Mail products except for EDDM-Retail and to Bound Printed Matter flats and parcels.

Enlarge Maximum Size for Plus One

Currently, the maximum size for Plus One mailpieces is 6"x9.5".

The Postal Service is proposing to increase the maximum size for Plus One mailpieces to 6"x11".

Adding Optional Preparation Standards to USPS Marketing Mail Carrier Route Automation Letters

The Postal Service is proposing to create an optional tray preparation for High Density and High Density Plus letters. This optional tray preparation would allow mail preparers to combine multiple mail owner's eligible HD and HD+ letters with 5-digit letters in one tray to reduce the volume of residual trays entered in the mailstream.

Matching Nomenclature & Classification Standards to Network Redesign

New Network Future State Nomenclature Mapping - Under Phase 1 of the Postal Service network future state, the Postal Service is revising the DMM to provide site mapping nomenclature for facilities (e.g., NDC/RPDC). Phase 1 will not include site mapping in the Quick Service Guides (QSGs) or revisions to destination entry pricing nomenclature or labeling lists.

In some cases where there is overlapping of nomenclature in the DMM for market dominant and competitive products (e.g., DMM 705.8.0) the site mapping nomenclature will be included in the Federal Register Notice for the domestic competitive products price change.

2025 Promotions

The Postal Service has been incenting mailers to integrate mobile technology and use innovative print techniques in commercial mail since 2012. These promotions have become an integral way for industry to try new things and innovate their mail campaigns. A 2025 Promotions Calendar is planned with opportunities for mailers to receive a postage discount by applying treatments or integrating technology in their mail campaigns.

Mail Growth Incentives Continuation in Calendar Year 2025

For calendar year 2024, the Postal Service introduced two new incentives designed to promote the growth of First-Class Mail® (the "First-Class Mail Growth Incentive") and USPS Marketing Mail® (the "Marketing Mail Growth Incentive"). The effective dates of both incentives is January 1, 2024 through December 31, 2024.

The Postal Service is proposing to continue both incentives for calendar year 2025.

These proposed revisions will provide consistency within postal products and add value for customers.

Although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comments on the following proposed revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations. *See* 39 CFR 111.1.

We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes.

18.3 Presort Terms

Terms used for presort levels are defined as follows:***

[Revise items (o) through (q) to read as follows:]

- processing distribution center (RPDC [parcels]) in whose service area the mail is verified/entered.
- p. SCF: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) / local processing center (LPC [letters/flats]) or regional processing distribution center (RPDC [parcels]) (see <u>L005</u>).
- q. Origin/entry SCF: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) / local processing center (LPC [letters/flats]) or regional processing distribution center (RPDC [parcels]) (see <u>L002</u>, Column C, or <u>L005</u>) in whose service area the mail is verified/entered.***

18.4 Mail Preparation Terms

For purposes of preparing mail:***

[Revise items (r) and (s) to read as follows:]

- r. An *origin 3-digit* (or *origin 3-digit scheme*) tray/sack contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF/LPC (letter/flats)/RPDC (parcels) in whose service area the mail is verified. A separate tray/sack may be prepared for each 3-digit ZIP Code (or 3-digit scheme) area.
- s. An *origin/entry SCF flat tray or sack* contains all 5-digit and 3-digit bundles (regardless of quantity) for the SCF/LPC (letter/flats)/RPDC (parcels) in whose service area the mail is verified. At the mailer's option, such a flat tray/sack may be prepared for the SCF/LPC/RPDC area of each entry Post

Office. This presort level applies only to nonletter-size Periodicals prepared in flat trays/sacks.***

[Revise text of item (v) to read as follows:]

v. Entry [facility] (or origin [facility]) refers to the USPS mail processing facility

(for example, "entry SCF/LPC/RDPC") that serves the Post Office at which

the mail is entered by the mailer. If the Post Office where the mail is entered is

not the one serving the mailer's location (such as for plant-verified drop

shipment), the Post Office of entry determines the entry facility.***

[Revise item aa(1) to read as follows]

aa. Machinable flats are:

 Flat-size pieces meeting the standards in <u>201.6.0</u> that are sorted into 5-digit, 3-digit, ADC/RPDC, and mixed ADC bundles. These pieces are compatible with processing on the AFSM 100.***

If pieces for one carrier route do not result in a full tray, mailers must combine pieces from at least two routes to make full 5-digit carrier routes trays, grouping pieces together by carrier route. If pieces for multiple carrier routes do not result in a full 5-digit tray, mailers must combine pieces from at least two 5-digit ZIP Codes to make 3-digit

carrier routes trays, grouping pieces together by carrier route. If pieces fill more than one tray but do not fill an additional tray, mailers must place excess pieces in a tray at the next sortation level. (See <u>6.10</u> for Optional 5-digit Tray Preparation).

[Add a new section 6.10 to read as follows]

6.10 Optional 5-digit Tray Preparation for High Density and High Density Plus ECR Automation Compatible Letters

6.10.1 Basic Standards

An optional 5-digit tray preparation allows combining multiple mail owners' High Density, High Density Plus, and 5-digit automation compatible letters in a letter tray when meeting the following standards:

- a. Each individual mail owner must meet the minimum quantities in <u>243.6.4.2</u> for High Density and High Density Plus to claim HD/HD+ prices with a minimum combined 150 pieces of 5-Digit, HD or HD Plus in a 5-Digit tray.
- b. The separate requirement of 150 pieces for 5-digit is waived.
- c. The minimums must be achieved by a single mail owner defined by their individual MID and/or CRID in the By/For of the eDoc for each carrier route.
- d. Walk Sequencing is not required within the letter trays.
- e. Bundling and facing slips are not required.
- f. Must meet the High Density and High Density Plus marking requirements in6.2.
- g. The Optional Tray Preparation must be used for entire mailing within eDoc.

6.10.2 Traying and Labeling

Mailers must make full 5-digit trays for automation-compatible, delivery-point barcoded letters that weigh up to 3.5 ounces and that meet the standards of 6.10.1. Bundling or facing slips are not required. Preparation sequence, tray size, and labeling:

7.5 Tray Preparation

Instead of preparing overflow trays with fewer than 150 pieces, mailers may include these pieces in an existing qualified tray of at least 150 or more pieces at the next tray level. (For example, if a mailer has 30 overflow 5-digit pieces for ZIP Code 20260, these pieces may be added to an existing qualified AADC tray for the correct destination and the overflow 5-digit pieces will still qualify for the 5-digit price). Mailers must note these trays on standardized documentation (see 203.3.2). Pieces that are placed in the next tray level must be grouped by destination and placed in the front or back of that tray. Mailers may use this option selectively for AADC ZIP

Codes. This option does not apply to origin/entry AADC trays. Preparation sequence, tray size, and Line 1 labeling:***

- j. ASF/NDC: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF)/network distribution center (NDC)/regional processing distribution center (RPDC) (see <u>L601</u>, <u>L602</u>, or <u>L605</u>).

If more than one 3-digit (or 3-digit scheme) area is served, as indicated in L005, a separate tray/sack must be prepared for each.

[Revise the text of item (k) to read as follows:]

k. Entry [facility] (or origin [facility]) refers to the USPS mail processing facility (e.g., "entry NDC/RPDC") that serves the Post Office at which the mail is entered by the mailer. Entry SCF/LPC (flats)/RPDC (parcels) includes both single-3-digit and multi-3-digit SCFs. Entry NDC/RPDC includes subordinate ASFs unless otherwise specified.

QBRM permits that have completed the onboarding process and consistently meet the requirements of IMbA are eligible for subsequent annual account maintenance and quarterly fee waivers, if applicable. 600 Basic Standards for All Mailing Services

601 Mailability

Overview

[Add a heading titled "10.0 Catalogs"]

* * * * *

[Add a section 601.10 to read as follows:]

10.0 Catalogs

A catalog is a bound (stapled, stitched, glued or fastened together along one edge) mailpiece with at least 12 pages, providing an organized listing of products or services offered for sale. A catalog mailpiece may be letter-shaped, flat-shaped or parcel-shaped, and is mailed at USPS Marketing Mail or Bound Printed Matter rates. The product listing must include images, photographs or illustrations of the products or services, descriptive details, fulfillment information and prices or contain an

alternate method for the reader to determine prices. Catalogs must contain enough information to allow an order to be placed, e.g., an order form, a phone number, a web address, or the means to access a web address. Catalogs will also enable fulfillment options for the products or services offered for sale.

* * * * *

4.4 Mail Preparation

* * * * *

4.4.2 Basic Standards for DALs and DMLs

[Revise the text of 4.4.2 to read as follows:]

The DALs or DMLs must be presorted, counted, and prepared by 5-digit ZIP Code delivery area. Only DALs or DMLs for the same 5-digit area may be placed in the same carton, sack, or tray. DAL or DML mailings claimed at carrier route basic or walk-sequence prices must be further prepared under the corresponding standards. Mailers must prepare DALs or DMLs as bundles in sacks or in cartons, unless prepared in trays under 4.4.6 when mailed with saturation flats. Different size cartons may be used in the same mailing, but each must be filled with dunnage as necessary to ensure that the DALs or DMLs retain their orientation and presort

integrity while in transit. Each carton of DALs or DMLs must bear a label showing the information in <u>4.4.5</u> unless a mailing identification number is used (see <u>4.4.1</u>).

Multiple containers of DALs or DMLs must be numbered sequentially ("1 of ___," "2 of ___," etc.).

4.4.3 Basic Standards for Items Distributed with DALs and DMLs

[Revise the text of 4.4.3 to read as follows:]

Except for bundles of saturation flats placed directly on pallets under <u>4.4.7</u>, the items to be distributed with DALs or DMLs must be placed in cartons or prepared in bundles placed in flat trays/sacks, subject to the standards for the price claimed. A label bearing the content description information in <u>4.4.5</u> must be affixed to each carton, trayed/sacked bundle, or pallet unless a mailing identification number is used (see <u>4.4.1</u>). Cartons of items (including those on pallets) may be of different sizes but must be filled with dunnage as necessary to ensure the integrity of the items while in transit. The gross weight of each carton or flat tray/sack must not be more than 40 pounds.

* * * * *

4.4.6 Optional Tray and Bundle Preparation

[Revise the text of 4.4.6 to read as follows:]

Mailers may prepare DALs or DMLs in letter trays according to <u>245.9.0</u> when DALs or DMLs are used in mailings of saturation flats. Bundles of saturation flats to be distributed with DALs or DMLs may be prepared on 5-digit pallets under <u>4.4.7</u>. Do not use pallets when the Drop Shipment Product indicates the delivery unit that serves the 5-digit pallet destination cannot handle pallets. For such delivery units,

mail with DALs or DMLs must be prepared in cartons, flat trays, or sacks. The tray(s) of corresponding DALs or DMLs must be placed on top of the accompanying pallet of flats, and the pallet contents must be secured with stretchwrap to avoid separation in transportation and processing. All containers must be labeled according to <u>4.4.5</u>.

4.4.7 Optional Container Preparation

[Revise the text of 4.4.7 to read as follows:]

Bundles of flats and cartons, flat trays, or sacks of items may be placed on pallets meeting the standards in <u>705.8.0</u>. Cartons or trays of DALs or DMLs must be placed on pallets with the corresponding items under <u>4.4</u> and <u>705.8.0</u>. The USPS plant manager at whose facility a DAL or DMLS mailing is deposited may authorize other containers for the portion of the mailing to be delivered in that plant's service area.

* * * * * *

4.6 Postage

* * * * * *

4.6.2 Postage Computation and Payment

Postage is computed based on the combined weight of the item and the accompanying DAL or DML. If the number of DALs/DMLs and items mailed is not identical, the number of pieces used to determine postage is the greater of the two. No postage refund is allowed in these situations. In addition, these methods of postage payment apply:***
