USPS Modernization Through Package Equipment Upgrades in April 2026

The Postal Service is continuing to modernize existing infrastructure through the installation of new, upgraded package processing equipment. New equipment investments will increase package sorting throughputs, increase automation capabilities for larger packages, increase sortation accuracy, and improve machine reliability.

During installation of the new package sorters, some facilities require temporary volume shifts to alternate package processing locations. Customers may see processing scans reflecting the alternate, temporary facilities. Below is the list of sites receiving new equipment in April, including those with alternate processing locations. There are no impacts to the FAST appointment scheduling or customer drop locations at this time.

Volume Shifts with Only Visibility Impacts (i.e. you may see alternate site scans):
