

USPS Pricing Engine Web Services

October 20, 2016.

Summary

This is the Domestic and International Pricing Engine SDK (version 11.4.3.0) for the October 21, 2016 Release. The following is a list of Enhancements included in this release.

Bug 7666 - International Retail and Business Calc - Revise GXG Insurance Amount

Issue:

GXG has free insurance for the first \$100, regardless of whether additional insurance is purchased. If additional insurance is purchased, the first \$100 is still free, and the cost is \$1.00 for each additional \$100 (or fraction thereof) over \$100 (i.e. starting at \$100.01).

On the international retail calculator, and when the customer has selected GXG service; on the extra services page the insurance amount should state "From \$1.00" under both the "Retail" and "CNS" columns. The calculation should be in \$1.00 increments starting a \$100.01 and for each \$100, or fraction thereof. Amounts of \$100 and under should reflect a zero insurance charge.

On the international business calculator, and when the customer has selected GXG service, and when clicking the extra services link; the calculation should be in \$1.00 increments starting a \$100.01 and for each \$100, or fraction thereof. Amounts of \$100 and under should reflect a zero insurance charge.

Action:

Updated GXG Price Table to correct amounts.

CR 7751 - Update Military Mail restrictions

The following rules have been updated to support the changes made to the Military Mail restrictions:
